Education

Maintenance Management Software Solutions for Educational Institutions - CMMS

At TMA Systems, we are committed to providing advanced software solutions for educational institutions that want to effectively and efficiently manage their physical assets and maintenance operations. These leading-edge solutions are a key tool for managers who recognize that maintaining their institution's assets and providing the highest level of service is imperative to meeting the high standards being demanded by their organizations. Most importantly, the information generated by these solutions will provide the ability to make better decisions, run operations more efficiently, and achieve the ultimate goal - improve your organization's performance.

Whether you are a smaller K-12 or a large College or University, TMA's [desktop](#) or [web-based](#) solutions will meet your needs. With the flexibility to start small and add to your software, our scalable product set and optional modules will grow with your organization's needs, requirements, and demands. TMA takes pride in knowing that these solutions were developed with the ease-of-use for beginners yet are robust enough to satisfy the demands of the most sophisticated facility professional.

Desktop Solutions

eXpress

A robust yet reasonably priced client/server (MSDE) maintenance management software solution that will provide your educational institution with the necessary tools to effectively account for and maintain your physical assets.

WorkGroup

A powerful client/server maintenance management software solution that has the ability to meet the needs of educational institutions that want to effectively maintain their facility's assets. WorkGroup provides you with advanced features and functionality such as multiple repair/cost centers, project management, and advanced materials management.

Enterprise

The ultimate maintenance management software solution that features an open architecture for superior interoperability. This powerful solution provides all the necessary tools to effectively maintain your educational institution's assets, plus additional functionality such as advanced accounting, materials management, and contract management.

Web-based Solutions

WebTMA *Client-Hosted*

A scalable, **web-based**, maintenance management software solution that provides you with the ability to access your educational institution's information via any standard web browser from any location at any time - access via the Internet or your intranet. Hosted by your organization, this powerful solution has all the features and functionality necessary to effectively maintain your facility's assets.

WebTMA *Subscription Service*

A scalable, **web-based**, maintenance management software solution that provides you with the ability to access your educational institution's information via any standard web browser from any location at any time - access via the Internet. Hosted by TMA as a subscription service, this powerful solution has all the features and functionality necessary to effectively maintain your facility's assets.

Superior Support and Services

These advanced solutions, along with world-class [implementation](#), [training](#), and [support](#), are key reasons almost 900 educational institutions have chosen TMA as their preferred solution. With world-class [professional services](#), TMA has the expertise and project management experience necessary to quickly and effectively implement your software solution, maximizing your return on investment (ROI)

with the least amount of disruption to your organization.
