Basic HTML

Tue, October 13, 2009 3:00PM - 5:00PM

This class is designed to show attendees how to create an HTML resource page using Windows NotePad. Many basic HTML commands will be reviewed. The HTML (web) page that attendees create will contain text, images, and hypertext links. An Internet Browser (Internet Explorer) will be used to view the page. Information on Internet resources for web page construction, on locating graphic files, and on loading pages onto servers will be provided. Keyboard, Internet and Windows skills required for this class. Contact Time: 2 Hr(s)

Taught by: [Adela Justice](#), Consumer Health Librarian - Information Services
Phone: 713.799.7183
