Raymund A. Paredes, COMMISSIONER OF HIGHER EDUCATION

### Mission of the Coordinating Board

The Texas Higher Education Coordinating Board's mission is to work with the Legislature, Governor, governing boards, higher education institutions and other entities to help Texas meet the goals of the state's higher education plan, *Closing the Gaps by 2015*, and thereby provide the people of Texas the widest access to higher education of the highest quality in the most efficient manner.

### Philosophy of the Coordinating Board

The Texas Higher Education Coordinating Board will promote access to quality higher education across the state with the conviction that access without quality is mediocrity and that quality without access is unacceptable. The Board will be open, ethical, responsive, and committed to public service. The Board will approach its work with a sense of purpose and responsibility to the people of Texas and is committed to the best use of public monies. The Coordinating Board will engage in actions that add value to Texas and to higher education. The agency will avoid efforts that do not add value or that are duplicated by other entities.

## Summary

Texas Education Code, Section 61.0582, gives the Texas Higher Education Coordinating Board the task of collecting information on deferred maintenance needs from public institutions. This data is collected annually by means of the following Master Plan (MP) reports:

- The MP2 identifies current accumulated deferred maintenance (ADM) needs and lists projects planned to address accumulated deferred maintenance needs in the next five years.
- The MP4 lists actual expenditures for ADM in the most recent fiscal year.

The following information summarizes MP2 and MP4 data submitted to the Texas Higher Education Coordinating Board (THECB) in October 2007 and covers the deferred maintenance plans for Fiscal Years (FY) 2008 – 2012 and actual expenditures made in FY 2007.

Graph 1 displays that projected expenditures for accumulated deferred maintenance for FY 2008 – 2012 totaled \$433.5 million, down seven percent from \$466.3 million for FY 2007 and down almost 11 percent since FY 2005.

Source: MP2 reports for FY 2005 - FY 2008. See Table 1, *MP2 Summary, Projected Deferred Maintenance Expenditures by Year*, reported fall 2007.

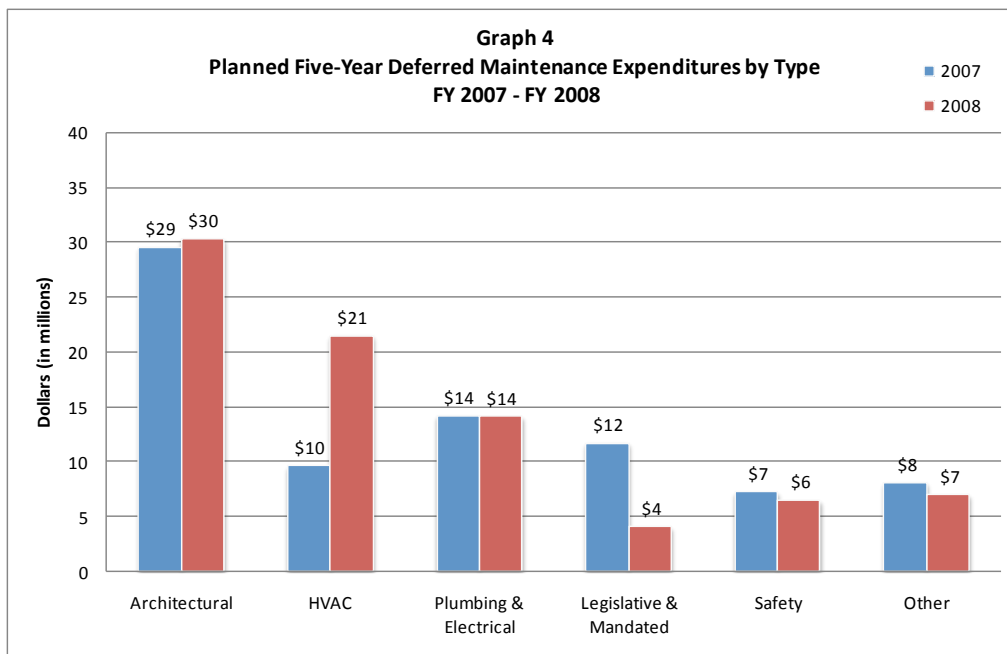

The bars in Graph 2 represent ADM over the past four years and the line represents the overall E&G replacement value. The FY 2008 replacement value for Education and General (E&G) space increased by 11.7 percent from FY 2007. The amount of ADM as a percentage of replacement value continues to decrease. Critical deferred maintenance (CDM) decreased slightly from 0.11 percent of replacement value in FY 2007 to 0.09 percent in FY 2008. All professional fees were included in the calculation of the replacement values for FY 2008 to ensure consistency. As a result, this year's values may be slightly inflated in comparison to FY 2005 - 2007.

Source: Deferred & Critical Deferred Maintenance as a Percentage of Replacement Value reports for FY 2005 – FY 2008. See Table 2, *Institutional Deferred Maintenance to Replacement Value Summary, FY 2008*.

Graph 3 shows the total plans for FY 2008 – 2012 by project type. More than a third of the funding is dedicated to architectural projects and another quarter to HVAC. This distribution remains consistent with previous years' planned expenditures by project type.

Graph 4 displays planned five-year expenditures by project type for FY 2008 compared to FY 2007. HVAC spending is up 110 percent from FY 2007, while legislative and mandated spending is down 66 percent.

Source: MP2 reports for FY 2007 – 2008. See Table 3, *Planned Deferred Maintenance by Type*.

The graph below shows the distribution of expenditures submitted in the FY 2007 and FY 2008 MP4 report. The institutions reported actual expenditures of approximately \$83 million on deferred maintenance for FY 2007. This is \$3 million more than what was reported for actual expenditures in FY 2006. The percent of HVAC spending increased eight percent while the architectural projects decreased 15 percent. Safety projects decreased 38 percent this year.

Source: MP4 reports for FY 2007 – 2008. See Table 4, *FY 2008 MP4 Summary, Actual Expenditures for FY 2007*, summarizes reported expenditures by institution.

## The Campus Master Planning Process

Section 17.101 of the Coordinating Board's rules and regulations provide the mechanisms for fulfilling the intent of the law. All general academic institutions, technical and state colleges, as well as health-related institutions, are required to submit data to the Coordinating Board for the following reports:

17.101 (2) Facilities Development Reports. The Board shall consider projects that are included in the facilities development plans (MP1 and MP2). A project that is not included in the plan may be considered if the Board determines that the institution, even with careful planning, could not reasonably have foreseen the project need.

(B) Campus Deferred Maintenance Plan (MP2). On or before October 15 of every year, an institution shall submit an update to its Campus Deferred Maintenance Plan (MP2) on file with the Board. This report does not include capital renewal projects. The report shall include:

- (i) a list of an institution's facilities backlogged or deferred maintenance needs for the next five years that cost \$10,000 or greater;
- (ii) the amount the institution plans to designate each fiscal year for the next five years to address the backlogged or deferred maintenance reported in the Campus Deferred Maintenance Plan;
- (iii) the amount of an institution's facilities critical backlogged or deferred maintenance needs for the next five years that cost \$10,000 or greater;
- (iv) a plan to address deferred maintenance if a project is delayed three years beyond its originally scheduled completion date; and
- (v) an explanation for the delay in a project and a plan to address deferred maintenance if a project has remained on the institution's MP2 report for a third year.

(C) Campus Addressed Deferred Maintenance Report (MP4). On or before October 15 of every year, an institution shall submit an update to its Campus Addressed Deferred Maintenance Report (MP4) on file with the Board. The report shall include the amount of backlogged or deferred maintenance addressed in previous fiscal year.

The Coordinating Board uses deferred maintenance data to gauge how well institutions are taking care of their facilities. The MP2 and MP4 data collected from each institution by THECB each October is compiled into a master database and summarized in a report.

The Board uses the ratios of deferred and critical deferred maintenance to building replacement value to evaluate construction project applications that are submitted for review. Deferred maintenance is considered critical if it places the institution's facilities, occupants, or mission at risk. Critical auxiliary deferred maintenance is not considered in the deferred maintenance to replacement value ratio because auxiliary enterprise entities receive funds through services provided. Currently, the Board standard requires the ratio of ADM to replacement value be 5 percent or less. The Board's standard for CDM is zero. A ratio above the standard may cause the Board to question whether proposed project funds might best be used to address the backlog of deferred maintenance on a campus.

Replacement Values calculation up to date as of 5/13/2008, Square Footage values from Fall 2007 Certified Facilities Inventory

**Definitions:**

*Critical Deferred Maintenance*--The physical conditions of a building or facility that place its occupants at risk of harm or the facility at risk of not fulfilling its functions.

*Deferred Maintenance*--An existing or imminent building maintenance-related deficiency from prior years that needs to be corrected, or scheduled preventive maintenance tasks that were not performed because other tasks funded within the budget were perceived to have higher priority status. The accumulation of facility components in need of repair brought about by age, use, or damage for which remedies are postponed or considered backlogged. This may include those repairs postponed due to insufficient funding.

*Education and General (E&G)*--Space used for teaching, research, or the preservation of knowledge, including the proportional share used for those activities in any building or facility used jointly with auxiliary enterprise, or space that is permanently unassigned. E&G space is supported by state appropriations.

*Replacement Value*--The value of an institution's overall campus facilities, as determined annually by the Board. The method of calculation is based upon recently approved Board project costs, with adjustments based upon room types and the institution's location within the state. Replacement values for public universities, the Lamar State Colleges, and the Texas State Technical Colleges are calculated only for E&G space. Replacement values for public health-related institutions are calculated for the NASF space. Replacement values are used to measure the validity of construction projects that are submitted to the Board for approval and are not recommended for insurance purposes.

*Net Assignable Square Feet (NASF)*--The sum of all areas within the interior walls of rooms on all floors of a building assigned to, or available for assignment to, an occupant or use, excluding unassigned areas. NASF includes auxiliary space and E&G space.
